GREAT LOSS OF CATTLE IN THE

speculations About the Cabinet-Soldiers' Home Bill-Crop Summary-Grain for Germany.

[SPECIAL DISPATCHES TO THE RECORD UNION.]

Appalling Loss of Cattle by the Storm in the Northwest. CHICAGO, February 20th .- The Times' Lincoln, Neb., special says: The damage to the telegraph wires has made the task of collecting the details of the late storm in that Cleveland will go to the Pacific Coast Colorado and western Nebraska very slow and tedious. As the news comes in it men who have called on the President in shows that the disturbance was the worst in the history of the region affected by it. came away with the same impression. It The storm raged in the mountains and descended upon the plains. These had been pointed for Caiifornia, although there are a dry and free of moisture so long that the number of applicants among the Demodust mingled with the snow in resistless crats. The Democrats who are being

torrents, and neither man nor beast could stand before the rush. This compound filled narrow cuts level full, and effectually blockaded the tracks. Fortunately the cuts are shallow and the snow plaws were any shallow and the snow plaws were are shallow, and the snow plows were able to clear them out. The roof of the Brooks arrived here to-night from Califor-Burlington round-house at Akron was blown off. West of McCook, two men were picked up dead, and another so badly frozen and exhausted that his life is despaired. Many other fatalities are expected when the reports come in from territory distant from the railroads. As the trains came in to-day the passengers and train men saw cattle in droves buried to their heads in snow. As hardly a cow was to be seen elsewhere, it is evident that many are entirely covered. Most of those seen will perish, and in fact all, except a few that can be found and dug out by a small force available for that purpose, will be lost. The loss of cattle will be some thing appalling. The storm covered the entire range on the east side of the Rocky Mountains from the British line to New Mexico, and the eastern edge lapped into Nebraska, to the North Platte and the McCook. East of these points no damage

was done. Unless stories are exaggerated, not less than 25 per cent of all the cattle on the range are wiped out. San Francisco Postoffice Bill. Washington, February 20th.—Senator Williams and Jesse D. Carr had an inter-Which is made from mild, aromatic and particularly selected and prepared tobacco, and combines all the qualities which may be expected from a health cigar. Williams and Jesse D. Carr had an interview with Holman of Indiana at the Hamilton House last night, that leads to the belief that something may be done with the San Francisco Postoffice bill before adjournment. Holman is notorious for his objection to all legislation that involves the journment. Holman is notorious for his objection to all legislation that involves the expenditure of public money outside of his own district, and the only way to pass the postoffice bill in the House this session is to secure unanimous consent for its consideration. If Holman can be enlisted in support of the measure, it is believed that i can be brought before the House. To morrow Holman will introduce Carr to D.bble, Chairman of the Committee on Public Buildings and Grounds, and the ef-fort will be made to enlist his good offices. The whole scheme may fall through, but a final effort will be made this week. Mr. Morrow has the bill in charge, and he will make a request for unanimous consent to onsider the bill at the first opportunity.

Speculations Regarding the Cabinet. NEW YORK, February 20th.—The Star's Washington special says: There is no longer any doubt here that Carlisle is to be Secretary of the Treasury. It is also thought to be settled that Pendleton is going into the Cabinet, and Garland is seen to the set of going out. There does not seem to be as much certainty as to Colonel Lamont, but it is the opinion that he will be Postmaster-General. He has wonderful executive abilities and great skill in dealing with

To day the chances for the appointment f Assistant Secretary of the Treasury Fairchild, to be Manning's successor, are very remote. He is at present entirely out of the list of possible selections for this high position. The President may eventually reconsider his present determination, and promote Fairchild, but he should select some man who will bring the administra-ion of the Treasury more closely into acord with the views of the Democratic maority in the House of Representatives. The best-informed politicians take no stock in the rumor that either Pendleton or Car- Indian Lands Transferred to the Govsle will be Manning's successor, and the oom for Smith Weed of New York is being worked up.

an end and the country at peace.

California Soldiers' Home Bill in Jeopardy. Washington, February 20th.-There is danger of the failure of the bill to establish an Address to the Workingmen of the a Soldiers' Home in California. When Senator Williams secured the passage of the House bill for this purpose, with an amendment increasing the appropriation to \$150,000, the name of James A. Waymire to \$150,000, the name of James A. Waymire an address to the workingmen of the counstances, and a most bewildering diversity was inserted as one of the managers of the Home. This name was put in after conthe Rev. Dr. McGiynn from the Catholic to the House for concurrence in the Senate endment it was referred to the Military Affairs Committee, and on motion of struck out and that of William Blanding inserted instead. The reason for the change seems to be that Blanding is a Democrat. As yet no motion has been made to get the bill before the House in order to act upon ne Senate amendments, or to ask for a conference, and as to secure action in the House the bill now requires unanimous consent, the chances for the final passage

of the bill are thought to be waning. Western Crop Summary. CHICAGO, February 20th .- This week's of the recent sleet storms, and accompanying cold weather, is reported from various portions of Illinois, Indiana, Missouri affecting the prespects of winter wheat, continue to be favorable. In Hamilton, Hardin and Kane counties, of Illinois, the outlook is regarded as precarious, with many of the fields covered with frozen sleet. The fields in Michigan and Wisconsin are nearly all covered, and the reports are uniformly favorable. Reports from a few winter wheat counties of lowa and few winter wheat counties of Iowa and Minnesota are generally good. The corn movement is free in Ohio and Indiana, but is very light in all other Western States. In Minnesota and Missouri there is very light and Missouri there is very light accorn for shipment, and the movement is the state of the state in Minnesota and Missouri there is very hittle corn for shipment, and the move-ment is very light. Many Iowa and Illinois counties are barren, and are im-porting corn at from 35 to 40 cents per The roads are badly blocked hroughout Dakota, and very little grain of any kind is moving to market.

Rosenthal; Grand Treasurer, E. which Grant sent from the front in 1864, at a time when our Congress was scared and the people of the North were in dismay at the terrible slaughter of the army when Grant drove Lee toward Richmond. I refer to the dispatch, "We will fight it out for the dispatch, "We will fight it out to the dispatch, "We will fight it out to the dispatch, "Now." Now. on this line if it takes all summer." Now, it was written by Stanton when Lincoln was in conference with him at the War Department. They were both plantmed about the political outlook in the Northern States. Discouraging accounts from the seaf of war were telling against the Administration, and the fear, in consequence, that Lincoln would not be re-elected prompted Stanton to lo something to reassure the people and retain their confidence in the successful termination of the war in favor of the United States, gives the total exchanges for the week ending February 19th as \$50,233,465, a decrease of one-quarter.

New York, February 20th.—A cable special from London of February 19th says: The other day I met Manuel M. Menoses, a Peruvian Deputy and Minister to the Pope. Menoses unfolded a tale of a bonanza about which our ex-Mayor Grace may be able to give further details. Peru, says Menoses, desires to be entirely rid of its debt of \$200,000,000, of which one-half has been assumed by Chile. The offer every important port are to be thrown in to make the offer altogether irresistible. Menoses talked very enthusiastically, and said that millions awaited the men who could raise the funds. He also said that Grace was bound to do it, as he had sent his brother Michael and clever engineers to look into the thing. There is coal in great quantities. Menoses says that Grace has a rival in a French financial institution, and that both are working very quietly to get the coveted prize. The engineer of the freight train, Edward S. Kiler, was not intoxicated as charged, out was worn out with sixteen hours and fifty minutes' continuous duty, with a green fireman and poor engine. He had plenty of time to get to Republic from Seneca siding—thirty minutes for ten miles—but his engine was so poor and leaked so that the fires were put out, and it died on the track at the point of the collision. The conductor of the freight, . F Fletcher failed in his duty for not dagging the limited express, for he knew the engine had died ten minutes before the express was due. The brakes on the express were inferior and ineffective, for they failed to diminish the speed of forty three miles an hour more than one-half in a distance of 1,000 feet. The manner of heating and lighting the express cars was inferior, ansafe and dangerous, and conrary to the laws of the State of Ohio. They entered into an agreement by which the amount of silver to be coined early was fixed for each member of the Union. The coinage of all the countries was of like character, and to be received without discount throughout the Union on public and private account. Greece joined the Union in 1868, Spain in 1871, and sub-sequently Servia and Roumania also became members. Some of the South American States also use the Latin Union coinage. Spain alone, of the countries of the Union, coins a gold piece not used by the others. The unit of coinage in the Latin Union is the franc; it has different ames eisewhere, as in Italy, the lira: in Servia, the dinar; in Spain, the peseta, but the value is always the same. The periect lecimal system of France is also used, and the convenience of the coinage has led to its wide adoption. It is the most widely circula ed coinaze system in Europe, being used by about 148,000,000 of people. The system is theoretically a double-standard one, with a ratio of 15½ to 1; but the States of the Union, in 1874, by mutual consent, practically suspended the coinage of silver, thus producing what is called a "limping standard," the effect being to keep coined

silver above its market value. A FEW LAUNDRY HINTS .- A spoonful of ox-gall to a gallon of water will set the olors of almost any goods soaked in it previous to washing. A DRASTIC MEASURE.

The new anti-polygamy bill, and which has passed both houses of Congress, is one of the most emphatic and sweeping "Acts" that has ever been proposed for a place among the Federal statutes. Utah is a Territory, and therefore within the unrestrained legislative power of Congress, which after many years of temporizing, has at last reached a point where mercy has been abandoned and rigor made the rule. The new bill, which, it is believed, is sure to receive Executive approval, discloses only the objection that its stringency may bring on some sort of reaction and awaken some sympathy for the Mormons. But it will be found self-defensive if its provisions, one after another, are taken up and viewed in the light of the tyranny of the Mormon Church and its past bloody record; the intolerance of that body and the cruel rule of its priesthood; the unscrupulous manner in which, through the agency of church corporations, it has absorbed public wealth and sequestered to the cow under which the Mormon magnates have held the local Courts; the tool the Church has made of the Territorial Legislature; the prostitution, by the Mormom system, of the public schools to the ends and purposes of polygamy; the absolute slavery of conscience in which the priesthood has held the laity; the recklessness of church proselytizing abroad, and the deceit under which immigration has been fostered; the secrecy with which the Church has surrounded its marriage ceremonial. All these and other matters, and the history related to them fortify the action Congress has taken. For it has come to this, that the nation is defied, her laws set at naught, and her authority spurned by a power claiming, under the Constitution, the right to maintain a system abhorrent to the American sentiment.

The agreed bill provides for the proper certification of all marriages in the Territory, and makes either the husband or wife a competent witness in cases of bigamy, polygamy, or adultery, where the other is concerned as defendant. The Territorial laws permitting illegitimate children to inherit the property of their parents is set aside, for it is now but an aid to polygamy. The Probate Courts, which have for thirty years been merely convenient tools of the church, are to be, except for very limited purposes, abolished, and to the Territorial Courts is to be transferred the jurisdiction that has been exclusively that of the former. The Territorial Courts being Federal, will be free from church control. Property that has been covered by the cloak of the church corporations is to be declared escheat to the United States, for the benefit of the common schools of the Territory, and that these schools may be no longer priestdriven, the Supreme Court of the Territhe schools. Widows are to be entitled to seeds of the diseases. a third of the income and estates of their late husbands; woman suffrage is forbidden to be any more practiced in Utah. not because in principle it is wrong or impracticable, but because in Utah the church uses it to forge the chains of its subjects, and more firmly secure women in bondage.

The special charter-practically a license to do what it will-of the Church of Jesus Christ of Latter Day Saints is to be revoked, and the Attorney-General of the United States will be required to wind up its affairs in legal proceedings to be instituted. This is an especially praiseworthy provision, and will drive the Church to avail of such general incorporation laws as are open to other religious denominations. the license to hold realty sufficient for houses of worship, parsonages, and probable for religious schools: that no one shall the for religious schools: that no one shall the for religious schools: that no one shall the formula of the first to denounce them.

All this means the further decline in importance of the State Governments. It means more than this. The Railway Department of the Federal Government will be careful to inquire as to its owner.

that this will work their disfranchisement then they will be deserving of the penalty, since no man should enjoy the privilege of an American sovereign who is unwilling to subscribe allegiance to the laws of the land, whenever the proper legislative authority deems such form needful for the public welfare, as a voting and election regulation. Finally, the Mormon militia is to be mustered out, and general militia laws to be passed, subject to approval by

Congress. These are the chief features of the Act. They cut to the core, and speak with an emphasis, not to be mistaken, the decree of the people of the United States concerning the twin evil to slavery-which must now follow its mate to the grave. The Act once approved, the question of its enforcement alone remains. As the President is to appoint the Territorial and Probate Judges, and the Supreme Court is to appoint the Supervisor of the schools; as the Attorney-General of the United States is given specific direction to enforce the law; as the representative system is to be the result of votes cast by those sworn to abide by the laws, and as women are to be accorded their property rights,

and illegitimacy is to be branded, we may look forward to the enforcement of the law. All pure interests will now conspire to this end, opposed only by the priests, the polygamists, and such few women as are too much blinded and enslaved by bigotry to see and accept the freedom the law offers to them.

LAWS OF VENGEANCE.

An Eastern exchange says that bill are

pending before both the Illinois and Indiana Legislatures, providing that in a case of deliberate murder, when the murderer is the father, brother or husband of a woman who has been betrayed, and the slain man is proved to have been her betrayer, the offense is to be considered only as a misdemeanor, punishable only by a fine. We are ready to believe that this is an exaggerated statement of the true character of the measures. It is very difficult to believe that legislators anywhere would go o far as to place the execution of the law in the hands of men in this manner. It will be said that he who acted under such a law would do so with the full knowledge of the risk assumed; that he must be certain the case is one within the law. But appose such a bill to become a law, and a citizen to take the life of another under the belief that the victim of his selection was guilty, and it should appear on trial that he was in error in forming the judgment he carried to execution. There would be no conviction for murder in such a case, for the reason that the defendant would escape under the plea that he believed he was justified, and that the alleged facts brought to his knowledge, though unfounded, were sufficient to warrant his beliet and the action which the law itself

invited. Juries will not convict the men who avenge the honor of wives, daughters, and sisters, but the State cannot afford to itself public lands; the degradation polyg- set up an avenging code. It may be, as is amy has brought upon women in Utah; said in defense of the proposed new laws, that rules mankind; but that is not sufficient reason for putting upon the statute book the law of vengeance or for Governnents to delegate to individuals the righting of wrongs against them and society. If the law-makers of the Prairie State are so solicitous to throw new safeguards about womanly virtue, they can find more reason for visiting death upon the seducer, after trial and conviction according to judicial nethods. Let the law recognize the crime. out let it not make every man the judge of s commission, nor place at the mercy of any woman the life of any man, until he can be legally heard in his own defense

Any other rule looks back to savagery. ADVANCING TO CENTRALIZATION.

An article in this number from the Railway and Corporation Law Journal upon the effect of the passage of the interstate mmerce bill will be found worthy of careful study. It treats of a phase of the uestion upon which comparatively little has been said, the effect of the new law upon the political future of the country. The central thought of the article, which is clear and forcible, is that a dangerous advance is made by the bill by the National Government in encroaching upon the powers and prerogatives of the States, and consequent disturbance of the checks and balances so carefully and wisely devised by the fathers. It makes clear also that the Democratic party has departed from its traditions and its claim of adhesion to principles, abandoning the Democratic doctrine that the least governed are the best governed people, and that a rapidly centralizing government is menacing to republican institutions.

Boggs explained that the Prison Directors had already, in deference to the request of the Labor Union, discontinued the sale of granite from the Folsom Prison quarry, and the result has been a deficiency of \$25,000, which the present Legislature has already passed. He spoke at length in behalf of the policy which the Directors desired to pursue in the interest of the State.

Bowers spoke against the amendment, and objected to some of the provisions of the bill as being dictated by a class of laborers in their own personal interest and against those of the State. The speaker declared as a fact that mercantile houses in every community of Califor-Stave. The speaker deciared as a fact that mercantile houses in every community of California have for sale cheap goods manufactured in the State Prisons of Eastern States, because the manufacture of the same is not permitted in the California Prisons which are maintained at great expense by the people. This is certainly not in the interest of the laborers of California. These persons are cutting their own throats, but they don't seem to realize it. These labor organizations are building up a system of tyranny in this State that is un-American, and subversive of the boasted rights of freedom said to belong to America. He wanted to see all State institutions conducted on business principles, just as any citizen would conduct his own private business.

speaker Jordan, immediately after the reading of the Journal, advised the House to stick to the order of business, and he thought they could accomplish much more than by skipping around and trying to take up bills out of order. He was of the opinion that if the House proceeded regularly all the important bills would be considered. Every bill on the special and general file could be reached in this manner within three days.

Several motions to adjourn over to Wednesday were made and voted down.

At the afternoon session there was considerable hilarity. Immediately after the House had settled down to business, there was a large number who desired to get away on the afternoon trains, and who commenced making motions of adjournment into the middle of next week.

This brought out Brusie and Wright, who handled without gloves the legislators who were willing to draw the per diem, but not to render service therefor. The effect of the passage of the Reagan-cullom bill for the regulation of interstate commerce on the political future of the untry, seems to be entirely ignored in the consideration of that question by the rail. ilts, however, that the most dangerou ermanent and far-reaching effects of th bill become apparent. For one hundred years there has been a perpetual encroach-ment of the National Government on the powers and prerogatives of the States. The result has been an inordinate increase in the powers of the former, and a proportionate decrease in the powers and importance of the latter. The checks and balances of Government, constructed carefully and laboriously one hundred years ago, have steal a blanket from his own horse in cold laboriously one hundred years ago, have been swept away, and the State Govern-

exercise the right of a voter except he takes oath to support the Constitution and the laws, and especially the Anti-polygamy Act of March, 1882, and the Act now under consideration. If the Mormons claim der consideration. If the Mormons claim derived the constitution is a desire for alcoholic drinks.

An ar estan well at Lemoore, Dak., sunk for railroad uses, is attracting attention on account of its medicinal qualities. It is said that its continual use will put an end to a desire for alcoholic drinks.

great losses and gains upon slight interfernces by the Government. All the other Departments combined of the Federal Government cannot equal in importance that Department, which, fifty years hence, will superintend the railways. It is well to consider these results before the irrevocable

sten is taken. Descending from the plane of the political future of the country to the party politics of the day, an equally remarkable condition of things meets our view. A Democratic House of Representatives is supporting a bill which is diametrically opposed to fundamental Democratic prin ciples. The leaders of that party in gress do not know, or do not care for the principles of the party. They have bent their necks to the yoke of political ex-pediency, and think that adroit politics will do more for their party than a far sighted statesmanship. They have aband-oned the Democratic doctrine that the least-governed people are the best-governed people, and that a rapidly centralizing Govrnment is dangerous to the republican institutions of America. They are advocating measures that go to the extreme limit of the principles of government as advocated by the opposition for one hundred years. It is difficult to imagine a more un-Democratic piece of egislation than this. Had such a bill been presented in the days when Jefferson, or Madison, or Jackson, or Seymour, or Tilden guided the party, a united Democracy would be found opposed to it. The mere reading of such a bill in a Democratic House of Representatives is enough to cause the Democratic patriarchs to turn over in their graves and groan. The present leaders of that party have abandoned the faith of their fathers. They are re-creant to the trust confided in them by the masses of their party. Perhaps it is useless, yet it is pertinent here to quote the words of Mr. Tilden, the greatest statesman that the Democratic party has produced since Jefferson. In 1871, he said, speaking of the principles of the Democratic party: "Its creed is comprised of two ideas, first, to limit as much as possible all governmental power, en-larging always and everywhere the domain of individual judgment and action; secondly, to throw back the governmental powers necessary to be exercised as much is possible upon the States and the localities, approaching in every case the in-dividuals to be affected. These ideas dom-inate over the Democratic party, and find n it their best representatives. The opposite ideas-to meddle with everyth Murphy here offered a resolution that when the Senate adjours it be until Wednesday next, in honor of the birthday anniversary of the Father of his country. Those offered for 1887 include 100,000 francs for the discovery of an efficient remedy for Asiatic cholera; 10,000 francs each for the best works on physics, chemistry, and physiology; 7,500 francs for work on gen-eral embryology; 3,000 francs for researches on the phosphorescence of animals; 3,000 francs for a comparative study of the hearing apparatus in mammals and birds; 3,000 francs for a comparative study of the freshwater animal life of Africa, South Asia and Australasia; 2,500 francs for an improvement of the steam engine, or other invention contributing most to the progress of steam navigation; 2,000 for any valuable therapeutical discovery; 2,500 francs for work on the distribution of heat over the globe's surface; 500 francs for a theoretical and practical study of progress in aerial navigation since 1880; besides many others, ranging from a set of Laplace's works to 10,000 francs, for specified work in mathe matics, astronomy, chemistry, botany, medicine, mechanics, and other sciences, and in aid of scientific students. Papers are to be handed in before June 1st.

PHYSIQUE OF AMERICAN WOMEN.-Amercans used to be thin and scrawny, and were well laughed at by less nervous nationalities because they were so; now all this is changed and the typical American is actually corpulent. What does it mean that our women should suddenly take on fat to this degree? Where are the delicate, fragile types that looked as though the wind would blow them away? If you will observe the average woman, whether in the street or some place of amusement, the increase of her weight, the size of her generally will be a surprise if you haven't given the subject previously any thought Once on a time it was believed that the climate acted as a kind of Bant to the system but either this climate is losing its asperity or the art of living has become less wearing, for fat women abound, and what is more the flesh looks as though it had come to stay. The question also arises, does this increase denote less mental fret and worry? Are people happier for being stout? It looks jolly and good-natured, but which is cause and which is effect?—Boston Herald.

Care for the Children. There exists in every household a short and easy method of testing the compara-tive nervousness of the sexes. Take the very sweetest and most domestic of men, the most home-loving and equable, and see if he can have patience with the children, day in and day out, as can a wife much less gifted by nature with these fine qualities. The children may be the sweetest ever born, and yet each will be pretty sure to pass through stages in its development when its cross-questionings its needless resistings, its chronic deaf-nesses, its endless "What?" and "Why?" and "Whom did you say?" will furnish grounds of practice for saintship. An Ohio correspondent asks for instruc ion upon the cultivation of the blackberry in the field. In reply we would say that in field cultivation the blackberry is set in rows about eight feet apart, and three to four feet apart in the rows. If they are properly planted the new shoots from the roots will begin to show themselves in a very few weeks. Two or three of these only are allowed to grow the first year, and the ground ought to be kept free from weeds and frequently stirred. It is recommended to pinch off the terminal shoots of each plant when it has grown to a height of about three feet. That causes the plant to top. There will be no fruit the first year but the second year the throw out side shoots and form a bushy but the second year the previous years' growth of wood will bear fruit and then die. Therefore, as soon as the fruit is gathered, the wood which bore it should be cut away, that the new growth of wood may have plenty of room. If the system of pinching off the terminal shoot of the plant, as above recommended, is not fol lowed, the stalk will grow tall and slim ome permit this. But if it is permitted the stalk should have some support or it may be blown over. The system recommended, however, is the one by which the most fruit can be obtained. In the cultiva-

Verily the days of home-made underwear

The competition of the better class of storework is proving too keen.

The lingering drawback to Ready-made Underwear is that most merchants sacrifice quality to price.

We do not. Poor work is costly at any price. It pays always to buy the best. The best Underwear that is made anywhere in the United States is none too good for you—none too good for us-and we keep it.

Underwear of this superlative sort certainly costs us more. But is this saying that our price to you is higher?

Perhaps in years to come people will gradually find out the high character of service rendered by this department.

Not till then shall we probably have the full measure of trade warranted by the advantages presented.

"SARSFIELD" REMEDIES CO.

SARSFIELD'S REMEDY for the Blood and Constipation!
SARSFIELD'S REMEDY for Diphtheria and Pneumonia!
SARSFIELD'S CHRONIC ULCER SALVE! SARSFIELD, of Sacramento, became fortunately possessed of certain valuable remedial agents. With these he effected in Sacramento and Central California remarkable cures, and drew the approving attention of many physicians. So widespread became the fame of his remedies, that business men were convinced of their entire reliability, and of the truth of the marvels they accomplished. The result has been the formation of a Company to aid him in putting these needs for suffering humanity broadly upon sale. The Company has its Depot at No. 115 EDDY STREET, SAN FRANCISCO, but the medicines can be had of all reputable druggists.

The making of Certificates has related so largely to fraud, that the public has naturally grown suspicious of them. But those here referred to are by such prominent citizens, of such irreproachable character, and the cures are so well known, and the witnesses so easy to reach, that we make the references with-

MRS. H. C. GOODRIDGE, 28 Hawthorne street, nine years in bed with Chronic Ulcers and unutterable pain, and abandoned by physicians. Permanently cured in less than four weeks. Certified to by Mrs. Sarah B. Cooper, the well known philanthropist and President of the Kindergarten Association, San Francisco, FRANK CASSADY, Petaluma, Severe Hip Disease, over a year's standing. Cured permanently in thre months. Certified to by his uncle, Hon. James Denman, San Francisco, the widely-known and popular educator.

MRS. M. A. ADAMS, formerly of Sacramento, completely cured in four weeks at the residence of her brother, Benj. Welch, Master Car Builder, S. P. C., Sacramento, of Running Sore on the arm, of eight years' standing, and that had nearly sapped her life. MRS. L. P. ANDERSON, 710 Eleventh street, Sacramento, Swollen Limb of long standing. Cured in seven weeks.

W. S. DOAN, noted inventor of the Steam Wagon, Sacramento, 33 years of Fever Sores. Cured in forty days. Certified to by Wm. Gutenberger, ex City Trustee, Sacramento; Ala. Neilson, John Driscoll and H. G. F. Root, proprietors Union Foundry, Sacramento, and others.

JACOB OLSEN, Sacramento, speedily cured of a Chronic Ulcer.

JAS. McCORMICK, Vice-President Bank of Redding, eight years' suffering from worst character of Rectal Ulcer. Permanently cured in three and one-half months. [Note.—Nearly all these testimonials include reference to use of SARSFIELD'S BLOOD REMEDY, as well as of the ULCER SALVE.] W. A. DEAN, brother-in-law of M. H. DeYoung, of the San Francisco Chronicle, cured of aggravated Fistula in five weeks.

W. B. FITCH, Lincoln, Placer county, thirteen years of Hip Disease, cured in 11 months, [Was treated surgically ten years and given up by surgeons.] Mr. Fitch's brother was cured of Rheumatism of two years' standing by use of three bottles of the BLOOD KEMEDY and

one box of SALVE.

erid, watery discharges from the eyes and nose, the painful inflammation extending to the throat, the swelling of the mucous lining, causing choking sensations, cough, ringing noises in the head and splitting headaches-how familiar these symptoms are to thousands who suffer pe riodically 'rom head colds or influenza, and who live in ignorance of the fact that a single appli cation of Sanford's Radical Cure for Catarrit will afford instantaneous relief. But this treatment in cases of simple Catarrh

gives but a faint idea of what this remedy will do gives but a faint idea of what this remedy will do
in the chronic forms, where the breathing is obstructed by choking, putrid mucous accumulations, the hearing affected, smell and taste gone,
throat ulcerated and hacking cough gradually
fastening itself upon the debilitated system.
Then it is that the marvelous curative power of
SANFORD'S RADICAL CURE manifests itself in instantaneous and grateful relief. Cure begins
from the first application. It is rapid, radical,
permanent, economical, safe.

Rheumatic, Neuralgic, Sciatic, Sudden, Sharp and Nervous Pains and Strains relieved in one minute by the Cucicura Anti-Pain Plaster, the most perfect antidote to pain and inflammation ever compounded. What True Merit Will Do. The unprecedented sale of Boschee's German Syrup within a few years has astonished the world. It is without doubt the safest and best remedy ever discovered for the speedy and effectual cure of Coughs, Co'ds and the severest Lung troubles. It acts on an entirely different principle from the usual prescriptions given by Physicians. the usual prescriptions given by Physicians, as it does not dry up a Cough and leave the disease still in the system, but on the contrary removes the cause of the trouble, heals the parts affected and leaves them in a purely healthy condition. A bottle kept in the house for use when the diseases make their appearance, will save doctor's bills and a long spell of serious illness.
